[7:34 pm](#) **[AnseoAMuinteoir](#)**: [@lismiss](#) [#edchatie](#) dont feel like a young un today but I'll try my best ha

[7:35 pm](#) **[7MJB](#)**: [@lismiss](#) [#edchatie](#) Sure we're all young ones!

[7:35 pm](#) **[fboss](#)**: [#edchatie](#) There are 2 videos I like to think represent both ends of the tech-spectrum in schools...1/3

[7:36 pm](#) **[treezadcu](#)**: [#edchatie](#) - Teresa H checking in for first time. Business teacher and ICT co-ordinator

[7:36 pm](#) **[fboss](#)**: Here's one end (you might have seen this) The Medieval Helpdesk: <http://youtu.be/pQHX-SjgQvQ> 2/3 [#edchatie](#)

[7:37 pm](#) **[fboss](#)**: Other end of the spectrum - Joe's non-Netbook: <http://youtu.be/SkhpmEZWuRQ> 3/3 - love both of these vids-very illustrative [#edchatie](#)

[7:39 pm](#) **[flynntommy](#)**: [#edchatie](#) tommy flynn, second level, accounting/german, on career break but back in september :( sorry i'm a bit late!

[7:40 pm](#) **[sharonflynn](#)**: [#edchatIE](#) Sharon in Galway. First time I've been able to join in. I work in Higher Ed

[7:41 pm](#) **[donenda](#)**: Good vids Mr. B [#edchatie](#)

[7:41 pm](#) **[fboss](#)**: [#edchatie](#) Thanks for intros everyone, lets have your stories/ideas & solutions as to how to bring teachers on board who're tech-resistant

[7:41 pm](#) **[ConnollyTrevor](#)**: [#EdChatIE](#) With the recent grant we've new hardware that needs to be used- No help desk though!

[7:42 pm](#) **[seomraranga](#)**: [#edchatie](#) In my school everyone participated in a whole school Summer Course on IT two years in a row. It certainly raised awareness of IT.

[7:42 pm](#) **[7MJB](#)**: [#edchatie](#) 2 great videos. Really love the second one

[7:42 pm](#) **[ConnollyTrevor](#)**: [#EdChatIE](#) I'm hoping the benefits of Google Apps will get teachers, even reluctant ones engaged.

[7:43 pm](#) **[StephanieBaier](#)**: [#edchatie](#) I also loved the videos.

[7:43 pm](#) **[NL\\_84](#)**: @[seomraranga](#) [#edchatie](#) that sounds great, could do with something similar where I am.

[7:43 pm](#) **[annemcm](#)**: Hi all.. bit late joining prim teacher (5th), ICT co-ord in large school. [#edchatie](#)

[7:43 pm](#) **[seomraranga](#)**: [#edchatie](#) I can't say that it brought everybody on board straight away but it certainly raised awareness of integrating IT into the class.

[7:43 pm](#) **[magsamond](#)**: Love both of those vids @[fboss](#) [#edchatie](#) I think getting colleagues involved is chicken-egg stuff. They must see the value for the classroom

[7:43 pm](#) **[fboss](#)**: [#edchatie](#) - the easier it is for people to use, the less they feel like they'll break something.I think some teachers worry

- [7:44 pm](#) **[AnseoAMuinteoir](#)**: [#edchatie](#) as a sub I visit a lot of schools and generally find that most of them tend to steer clear of ict of any shape.
- [7:44 pm](#) **[7MJB](#)**: [#edchatie](#) I think more training in IT is necessary, especially for those of us in the job a while
- [7:44 pm](#) **[pamelaaobrien](#)**: ?[@donenda](#): Good vids Mr. B [#edchatie](#)? >> love the videos
- [7:44 pm](#) **[treezadcu](#)**: [#edchatie](#) - try to establish reasons for reluctance - fear, embarrassment, dislike tech, lack of opportunity?
- [7:44 pm](#) **[StephanieBaier](#)**: [#edchatie](#) [@seomraranga](#) Was the course on IT integration, or just using it. I think one problem teachers have is a lack of 1st hand ability.
- [7:44 pm](#) **[lissmiss](#)**: I agree mags: They must see the value for the classroom [#edchatie](#) 27 seconds ago Favorite
- [7:45 pm](#) **[sharonflynn](#)**: [#edchatIE](#) I think a lot of teachers are worried about technology for technology sake. They need to see the benefit to their teaching.
- [7:45 pm](#) **[fboss](#)**: RT [@treezadcu](#): [#edchatie](#) - try to establish reasons for reluctance - fear, embarrassment, dislike tech, lack of opportunity? Agree with this
- [7:45 pm](#) **[seomraranga](#)**: [#edchatie](#) The beauty of doing a whole school summer course in our own school was that we were using our own laptops in our own school.
- [7:46 pm](#) **[Wuzzhead](#)**: RT [@sharonflynn](#): [#edchatIE](#) I think a lot of teachers are worried about technology for technology sake. They need to see the benefit to their teaching.
- [7:46 pm](#) **[StephanieBaier](#)**: [#edchatie](#) Small doses with an immediate purpose. Our teachers want to know how to use it in the classroom today... not next week.
- [7:46 pm](#) **[annemmcm](#)**: We started with simple projects eg eTwinning..showcased in the school for children & teachers.. very successful way of raise aware [#edchatie](#)
- [7:46 pm](#) **[TheAgileAnalyst](#)**: RT [#edchatIE](#) I think a lot of teachers are worried about technology for technology sake. They need to see the benefit to their teaching.
- [7:46 pm](#) **[donenda](#)**: RT [@StephanieBaier](#): [#edchatie](#) Small doses with an immediate purpose. <--agreed, start small but make it very relevant
- [7:46 pm](#) **[seomraranga](#)**: [@StephanieBaier](#) [#edchatie](#) The course was both using new programmes/sites and showing how to integrate it in the classroom.
- [7:47 pm](#) **[NL\\_84](#)**: [@fboss](#) that's very true, teachers need to feel that they can experiment and try things out, otherwise they won't progress [#edchatie](#)
- [7:47 pm](#) **[fboss](#)**: RT [@seomraranga](#): [#edchatie](#) The beauty of doing a whole school summer course...we were using our own laptop?  
(cont) <http://deck.ly/~DloGN>
- [7:47 pm](#) **[7MJB](#)**: [@seomraranga](#) [#edchatie](#) Sounds great, but not sure if everyone would be willing to get involved.
- [7:47 pm](#) **[topgold](#)**: [@donenda](#) I'm also a late-comer to [#edchatie](#). I'm working in third level multimedia.

[7:47 pm](#) **[fboss](#)**: RT [@7MJB](#): [@seomraranga](#) [#edchatie](#) Sounds great, but not sure if everyone would be willing to get involved -does everyone have to be involved?

[7:47 pm](#) **[magsamond](#)**: [#edchatie](#) HOW IT's introduced to folk is crucial. Show relevance, make it accessible. Like all good teaching really....

[7:47 pm](#) **[sharonflynn](#)**: [#edchatIE](#) I agree with [@annemmcmm](#), showcasing of successful projects from other teachers can be very encouraging.

[7:48 pm](#) **[seomraranga](#)**: [#edchatie](#) We did a school review and identified IT as an area we as a staff wanted to develop, so it was great that most were on board.

[7:48 pm](#) **[annemmcmm](#)**: [@magsamond](#) Yep.. teachers also need time to 'play' with new tech to get comfortable & see potentials rather than challenges [#edchatie](#)

[7:49 pm](#) **[lissmiss](#)**: Whole school courses work best:) [#edchatie](#)

[7:49 pm](#) **[fboss](#)**: RT [@sharonflynn](#): [#edchatIE](#) I agree with [@annemmcmm](#), showcasing of successful projects can be very encouraging-esp. if by those same teachers

[7:49 pm](#) **[sharonflynn](#)**: [#edchatIE](#) Problem with a lot of IT training is that the focus is on IT, not the educational value.

[7:49 pm](#) **[7MJB](#)**: [@fboss](#) [#edchatie](#) I suppose not. I know many teachers like to do their summer courses online. Saves on child minding costs

[7:49 pm](#) **[AnseoAMuinteoir](#)**: [#edchatie](#) training should be provided from the start of college so NQTs come out being tech savvy

[7:49 pm](#) **[StephanieBaier](#)**: [#edchatie](#) I'm giving short lesson on Twitter 2morrow 2 our staff. I'm hanging out in conf. room all day. they can come when they have time

[7:50 pm](#) **[annemmcmm](#)**: [@sharonflynn](#) We found it gave more ideas without putting anyone on spot.. children were a big part in encouraging ideas too [#edchatie](#)

[7:50 pm](#) **[Wuzzhead](#)**: RT [@sharonflynn](#): [#edchatIE](#) Problem with a lot of IT training is that the focus is on IT, not the educational value.

[7:50 pm](#) **[treezadcu](#)**: [#edchatie](#) - I've got a few late-starters here - starting a few tailored sessions with them from tomorrow - a lot of hand-holding initially

[7:50 pm](#) **[fboss](#)**: [@7MJB](#) [#edchatie](#) - I agree - at times it has to be a balancing act because teachers are parents and have more than just their teaching

[7:51 pm](#) **[7MJB](#)**: [@AnseoAMuinteoir](#) [#edchatie](#) Agree. I'm learning a lot from my Hibernian student at the moment

[7:51 pm](#) **[sharonflynn](#)**: [@annemmcmm](#) [#edchatIE](#) Absolutely! Our experience in HE is that students are often the ones to bring reluctant academics on board with tech!

[7:51 pm](#) **[seomraranga](#)**: [#edchatie](#) If there was a system whereby teachers with more IT experience/confidence could be released to work with a teacher in their class.

[7:51 pm](#) **[flynntommy](#)**: RT [@magsamond](#): [@lissmiss](#) [#edchatie](#) In a really big school, working

[pm](#) dept by dept can help people getting started, help each other along

[7:51 pm](#) [beachmandy](#): @[StephanieBaier](#) That sounds brilliant, because it's casual, friendly - not overwhelming [#edchatie](#)

[7:52 pm](#) [AnseoAMuinteoir](#): @[7MJB](#) [#edchatie](#) hiberia is a ok start for ict but still not enough I find

[7:52 pm](#) [fboss](#): @[treezadcu](#) Hand holding helps alright - but they can also self-support as they work through things - they're not on their own [#edchatie](#)

[7:52 pm](#) [NL\\_84](#): @[AnseoAMuinteoir](#) true, I'm shocked at how little focus there was on ict when I was in training [#edchatie](#)

[7:52 pm](#) [magsamond](#): RT @[sharonflynn](#): [#edchatIE](#) >>> the CORE ISSUE>>>Problem with a lot of IT training is that the focus is on IT, not the educational value.

[7:52 pm](#) [beachmandy](#): @[treezadcu](#) Yes, hand-holding is brilliant too! [#edchatie](#)

[7:52 pm](#) [StephanieBaier](#): Twitter PD - I am even expecting the principal and Tech director to drop by for a quick lesson. @[beachmandy](#) [#edchatie](#)

[7:53 pm](#) [magsamond](#): @[StephanieBaier](#) Maybe you could tweet us some progress reports? [#edchatie](#)

[7:54 pm](#) [AnseoAMuinteoir](#): @[NL\\_84](#) [#edchatie](#) i wonder do they have the lecturers to cover ict properly the way we use it now ie more then photostory

[7:54 pm](#) [fboss](#): @[podubhaigh](#) - As usual, it's a handful of people who take some time and try tech-things out. Is it down to peoples' interests? [#edchatie](#)

[7:54 pm](#) [seomraranga](#): [#edchatie](#) It's worrying to hear "younger" teachers saying that there isn't enough emphasis give to IT in college.

[7:54 pm](#) [StephanieBaier](#): Progress... @[magsamond](#) [#edchatie](#) I will do that as part of the lesson. I'm trying to show them the beauty of PLN in Twitter.

[7:54 pm](#) [johnmavo](#): [#edchatIE](#) Sorry I am late

[7:54 pm](#) [7MJB](#): [#edchatie](#) I think Education centres need to advertise their courses better. They provide some great IT courses but tchs dont know about them

[7:55 pm](#) [lissmiss](#): @[BridCarlow](#) We did that also [#edchatie](#)

[7:55 pm](#) [AnseoAMuinteoir](#): @[7MJB](#) [#edchatie](#) esp for subs who dont have the staffroom notice board to check

[7:55 pm](#) [johnmavo](#): RT @[seomraranga](#): [#edchatie](#) It's worrying to hear . >>well if they kept off Facebook :-p

[7:56 pm](#) [seomraranga](#): [#edchatie](#) We're going to use some Croke Park hours to look at IT. Anyone else doing likewise?

[7:56 pm](#) [pamelaaobrien](#): [#edchatIE](#) think seeing what works for teachers in their classrooms might encourage others to get involved

7:56 pm **magsamond:** @StephanieBaier tell them folk are following in Ireland !! #edchatie

7:56 pm **treezadcu:** @7MJB #edchatie - or they're just too tired and frazzled to commit to an official course?

7:56 pm **fboss:** @StephanieBaier if you create a hashtag, please pass it on to us all, I'm sure we'll be able to send them a bit of encouragement #edchatie

7:56 pm **NL 84:** @seomraranga I remember being shown clicker, and how to use movie maker, little else and virtually nothing on how to use in class #edchatie

7:57 pm **StephanieBaier:** Hashtag... @fboss #edchatie I will put some thought into that and let you know. Thanks

7:57 pm **annemcm:** @seomraranga Yep, developing our eLearning plan ideas :- ) #edchatie

7:57 pm **lismiss:** Co-operative teaching worked for us. Techie with non techie working together to extend the learning of a specific topic #edchatie

7:58 pm **fboss:** #edchatie - people in the chat seem to be pointing at whole school courses and see the need to get school management on board too

7:58 pm **donenda:** The Principal/VP also needs to be on board - very difficult if you haven't support from the top #edchatie

7:59 pm **magsamond:** RT @treezadcu: @7MJB #edchatie - or they're just too tired and frazzled to commit to an official course? >ADDS> or unsure of it's quality ?

7:59 pm **StephanieBaier:** #edchatie Done thinking... Hashtag for my Twitter PD will be #nwrPD .... North Warren Regional Professional Development.

7:59 pm **annemcm:** @fboss Whole school teamwork with good leadership is very important, I think :- ) #edchatie

7:59 pm **pamelaobrien:** #edchatie with so much available may be daunting for non techie teachers to know where to start

7:59 pm **EIKel99:** #edchatie Ensure trainees do teaching practice in schools that embrace the use of ICT - they will be more likely to adopt it themselves

7:59 pm **7MJB:** @lismiss #edchatie A good system. Some people just need a bit of encouragement to get involved

7:59 pm **AnseoAMuinteoir:** @donenda #edchatie how to get that vital support though with an older fashioned p/vp

7:59 pm **fboss:** RT @annemcm: @fboss Whole school teamwork with good leadership is very important, I think :- ) #edchatie I agree - really important

8:00 pm **treezadcu:** @fboss #edchatie school management??? If they were really on board we'd be well on our way

8:00 pm **StephanieBaier:** Co-op learning will work if time is allocated for it. Everyone is busy. @lismiss #edchatie

[8:00 pm](#) **[seomraranga](#)**: [#edchatie](#) Certainly agree that if encouragement doesn't come from the top in the school, you're wasting your time.

[8:01 pm](#) **[magsamond](#)**: [@fboss](#) [#edchatie](#) Whole-school / dept is important if useful integration of ICT is to happen. Seamless integration, not bells / whistles...
